EDUCATION

Undergraduate Record

Graphic Era Hill University — B.Tech in Computer Science & Engineering — `Currently Pursuing (Aug 2022 – Present)`
Academic Record: 9+ CGPA in 1st Year & 9+ CGPA in 2nd Year

ISC Board (Class XII): Intermediate (89%)

ICSE Board (Class X): High School (94%)

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript
Web & Backend: React, Next.js, Node.js, FastAPI, HTML5, CSS3, REST APIs
Databases: PostgreSQL, SQLite, SQL
AI / ML & IoT: Machine Learning, Computer Vision, Facial Vector Matching, IoT Sensors & Telemetry
Developer Tools: Git, GitHub, Docker, Vercel, VS Code

TECHNICAL EXPERIENCE & PROJECTS

Kaarobarie POS Billing Software — *Restaurant Billing & Management Platform*
- Architected and developed a full-featured restaurant billing and management platform to streamline dining operations.
- Engineered transactional workflows, automated order tracking, and dynamic receipt generation to eliminate billing latency.

Railway Gangmen Safety System — *Safety-Focused Railway Monitoring & Warning System*
- Developed a safety-focused railway alerting system designed to protect track maintenance personnel (gangmen) from oncoming train hazards.
- Implemented real-time hazard detection and automated warning mechanisms to enhance track-worker situational awareness.

AI-Powered Missing Children Finder — *AI-Based Identification & Tracking Solution*
- Built an AI-based computer vision solution to assist in identifying and tracking missing children across surveillance camera feeds.
- Implemented facial vector matching and trajectory estimation to accelerate critical search operations during response windows.

IoT-Based Landslide Detection System — *IoT-Based Geological Monitoring & Early Detection System*
- Developed an IoT-based environmental monitoring and early detection system for landslide-prone terrains.
- Integrated multi-sensor telemetry to track geological displacement and soil moisture variations to trigger proactive hazard alerts.

AI-Based Pothole Detection System — *Computer Vision Road Surface Defect Detection Solution*
- Developed an AI-based road pothole detection solution leveraging computer vision algorithms for automated surface damage inspection.
- Automated road defect classification and coordinate logging to assist municipal teams with preventative infrastructure maintenance.

MANAGEMENT & LEADERSHIP EXPERIENCE

IEEE Student Branch, GEHU — `Member & Organising Committee`
Key Initiatives: TechnIEEEks 2025, SAARTHI 2025 (24-Hr National Hackathon), TechnIEEEks 2026
- Served as an Organising Committee member for flagship initiatives including TechnIEEEks 2025, SAARTHI 2025, and TechnIEEEks 2026.
- Demonstrated strong event coordination, teamwork, and logistics management across participant registration, scheduling, and workshop execution.
- Facilitated transparent team communication between faculty advisors, external mentors, and student participants throughout technical sessions.

Technology Business Incubator (TBI), GEU — `Member & Organising Committee`
Key Initiatives: Graphethon 2.0 (48-Hr National Hackathon), Graphethon 3.0 (72-Hr National Hackathon)
- Served as an Organising Committee member for Graphethon 2.0 and Graphethon 3.0 national-level hackathons.
- Managed high-pressure event logistics, venue coordination, and participant intake workflows across multi-day national hackathon sprints.
- Applied organizational and communication skills to coordinate cross-functional teams, ensuring uninterrupted operations and resource availability.

HACKATHON ACHIEVEMENTS

- SELECTED **National-Level Hackathons** — Team selected for national-level hackathons across competitive development sprints.
- SEMIFINALIST **Economic Times X GenAI Hackathon** — Semifinalist in nationwide generative AI challenge.
- FINALIST **PRAXIS 2.0 (Google Developer Groups)** — Finalist in national technical hackathon.
- FINALIST **Neural Nexus AI/ML Challenge** — Finalist at Grafest 2026.
